3062 Ranchview Lane North · Plymouth, MN 55447

# Features and Specifications Composite Fittings

Polyconn® now has a full range of custom designed composite push-in fitting solutions for you to choose from. They can be used in a variety of applications such as industrial, robotics, machinery, mobile and instrumentation. Polyconn® CB Composite fittings, offer a way to connect tubing quickly and easily with no need for tools. Polyconn® offers a broad range of composite push-in pneumatic fittings in inch and metric sizes to compliment our established nickel plated brass push-in fittings.

Polyconn's® CB composite fittings use a stainless-steel gripping-ring to grip nylon, 95 durometer polyurethane and polyethylene tubing. The nickel plated brass components on the fittings help to provide corrosion resistance and assist in prolonging the life of the fitting. All of the tapered threads come with pre-applied thread sealant and our parallel threads come with a recessed captive o-ring.

The advanced design of the Polyconn® push-in fitting places more gripper teeth in the fitting that are independent of the collet. This superior method allows the collet to guide and center the tubing into the fitting teeth on connection. When the need arises to disconnect, simply depress the collet which slides down and pushes the teeth entirely out of the way, disengaging the tubing completely.

## FEATURES

- \* Collet detents fully retracting gripper teeth.
- \* An oval collet makes it easier to disengage tubing.
- \* Custom colored collets available upon request.
- \* Body material nickel plated brass and black PBT (Polybutylene).
- \* Locking ring stainless steel.
- \* O-ring NBR.
- \* Working pressure 150 PSI.
- \* Pre-applied thread sealant.
- \* Black collets for inch style.

## USE

- \* Industrial
- \* Robotics
- \* Machinery
- \* Mobile
- \* Instrumentation

## SPECIFICATIONS

Product	Temperature Range	Pressure Range	Vaccum Rating
Composite Fittings	32°F - 140°F (0°C - 60°C)	0 - 150 PSI	To -29.5" Hg

# Features and Specifications Composite Fittings

The transitions fittings will connect your inch tube to a metric thread. These fittings have a BSPT, BSPP and NPT threads. They can be used in a variety of applications such as industrial, robotics, machinery, mobile and instrumentation. Polyconn's CB composite fittings use a stainless-steel gripping-ring to grip nylon, 95 durometer polyurethane and polyethylene tubing. The nickel plated brass components on the fittings help to provide corrosion resistance and assist in prolonging the life of the fitting. All of the tapered threads come with pre-applied thread sealant and our parallel threads come with a recessed captive o-ring.

The advanced design of the Polyconn push-in fitting places more gripper teeth in the fitting that are independent of the collet. This superior method allows the collet to guide and center the tubing into the fitting teeth on connection. When the need arises to disconnect, simply depress the collet which slides down and pushes the teeth entirely out of the way, disengaging the tubing completely.

## FEATURES

- \* Collet detents fully retracting gripper teeth.
- \* An oval collet makes it easier to disengage tubing.
- \* Custom colored collets available upon request.
- \* Body material nickel plated brass and black PBT (Polybutylene).
- \* Locking ring stainless steel.
- \* O-ring NBR.
- \* Working pressure 150 PSI.
- \* Pre-applied thread sealant.

## USE

- \* Industrial
- \* Robotics
- \* Machinery
- \* Mobile
- \* Instrumentation

## SPECIFICATIONS

Product	Temperature Range	Pressure Range	Vaccum Rating
Composite Fittings	32°F - 140°F (0°C - 60°C)	0 - 150 PSI	To -29.5" Hg

Now that you have your  
Fittings don't forget  
your tubing!

Polyconn offers Push-In  
fittings in many different  
materials!

Polyconn carries Polyurethane,  
Nylon, Polyethylene and many  
more materials to choose from!

Available Materials:  
Composite  
Plastic  
Nickel Plated Brass  
Stainless Steel  
D.O.T. Brass

**Polyconn**<sup>®</sup> the one-stop shop for your  
pneumatic needs.
