RE: REACH Compliance

REACH requires registration when certain materials, whether used alone or within an article, are imported into or produced within the EU to the extent that the amount of any such material exceeds 1 metric ton per year and the material is present in concentrations above 0.1% wt/wt per article. At present, the materials subject to this directive are those that were identified by the European Chemical Agency (ECHA), on their list of substances considered "Substances of Very High Concern" (SVHC). The complete list may be accessed through the ECHA website: <http://echa.europa.eu/web/guest/candidate-list-table>

Polyconn has completed a preliminary evaluation and believes that none of our products supplied to Corning in Appendix A contain any of the identified SVHCs in amounts that exceed those thresholds.

Thank you,
